DETAILED ACTION

Response to Amendment

1. Applicant's cancellation of claims 1-50 and 52-53 is acknowledged.

Drawings

2. The drawing objection with respect to missing reference characters is withdrawn in view of applicant's remarks. Applicant's preliminary amendment dated 7 August 2002 including amended drawing sheets 1-10 containing reference characters is acknowledged.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 51 and 54-58 are rejected under 35 U.S.C. 102(b) as being anticipated by Dickie (5,337,924). Dickie teaches of:

51. A pump (Figs. 1-4) for dispensing fluid, said pump comprising:
a pump body (10);
a fluid reservoir formed in said pump body; and,
a deflectable diaphragm (22) mounted in a wall (14) of said pump body so as to be exposed externally of said pump, said diaphragm being deflectable into said fluid reservoir so as to decrease the volume encompassed by said fluid reservoir.

Art Unit: 3754

54. A pump as in claim 51, wherein said pump is a pre-compression pump (that is a given force is required to initiate pumping).

55. A pump as in claim 51, wherein said fluid reservoir is at least partially defined by a rigid wall (14) of said pump body.

56. A pump as in claim 55, wherein said diaphragm (22) is mounted to said rigid wall (14).

57. A pump as in claim 51, wherein said diaphragm (22) is in contiguous contact with the volume encompassed by said fluid reservoir.

58. A pump as in claim 51, wherein said diaphragm (22) is deflectable from an initial position, where said diaphragm extends outwardly from said pump, to a second, deflected position, where said diaphragm extends into said pump, said diaphragm decreasing the volume encompassed by said fluid reservoir when in said second position (see column 3, lines 1-14).

Response to Arguments

5. Applicant's arguments with respect to claims 51 and 54-58 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
